Who We Are

CEO's Message – Adel Saif Al Jaber

CEO's Message

"ZeroCommute was founded on a simple truth: commuting should not cost the planet its future. Around the world, millions of employees waste hours in traffic, while corporations struggle with Scope 3 emissions and rising costs. At ZeroCommute, we've built a solution that is both climate-positive and productivity-enhancing. Our electric double-decker shuttles and real-time ESG dashboards give businesses a way to achieve net zero while improving employee well-being. This is not just about transport — it's about shaping a global standard for sustainable corporate mobility. Together, we can redefine how the world commutes, and accelerate the transition to a carbon-free economy."

Global Impact Metrics

21,000
/ year

Cars off the road

850,000L
/ year

Petrol saved

2,200
tonnes / year

CO₂ avoided

200,000
hrs / year

Hours reclaimed

20 trees
equiv. / year

Oxygen generated

0.5
tonnes / year

CO₂ captured (Bio-facade)
